Remote / Office | Open to relocate

Summary

Computer Engineering Master's student at MAUP (expected 2027) focused on Python backend development and PostgreSQL design. Built and deployed a production Telegram bot currently serving 2,100+ daily users, plus a desktop inventory system as a diploma project for a real client. Looking for a Junior Python Developer role where I can contribute to real products and grow within a strong engineering team.

Skills

Languages: Python (primary), C++, SQL, JavaScript (basic)

Backend: Django (ORM, admin, management commands), python-telegram-bot, asyncio, REST API integration (GitHub, Telegram)

Databases: PostgreSQL (schema design, queries, normalisation), SQLite

Frontend: HTML, CSS, Tailwind CSS, vanilla JavaScript, responsive design

Tools: Git, GitHub, PyCharm, VS Code, pgAdmin, Tkinter, matplotlib, ngrok

Concepts: OOP, CRUD, role-based access control, caching, environment-based config, deployment basics

Spoken: Ukrainian — Native | English — A2 (improving)

Projects

Blackout Schedule Bot — Production Telegram Bot

2025 — Present

Python · python-telegram-bot · matplotlib · SQLite · asyncio

- Designed and deployed a Telegram bot serving 2,100+ daily active users with personalised Ukrainian power-outage schedules.
- Generated live hour-by-hour timeline charts with matplotlib showing the current time position and outage windows per energy group.
- Implemented admin analytics: new-user notifications, daily-growth tracking, total user counter, real-time chat-id capture.
- Maintained 99%+ uptime since launch; source private, currently in production.

Personal Portfolio Website — Solo Project

May 2026

Django · Tailwind CSS · GitHub API · Telegram Bot API · WhiteNoise

- Built a single-page portfolio site from scratch with 6 Django models and a fully customised admin panel.
- Integrated the GitHub REST API with 1-hour file-based caching to auto-sync 19+ repositories and language statistics.
- Wired Telegram notifications for contact-form submissions using the Bot API with HTML-formatted messages.
- Implemented dark-neon UI with animated gradients, scroll-reveal, typewriter effect, and project image galleries.
- Source: github.com/OleksanderZabila/portfolio

Auto Pidkliuch — Inventory Management System — Diploma Project

Feb 2025 — May 2025

Python · PostgreSQL · Tkinter · pycpg2

- Designed an 8-table normalised PostgreSQL schema for an auto-parts store covering products, suppliers, customers, and sales.
- Implemented full CRUD across 4 core entities and a role-based access control system (Admin / Cashier).
- Built a Tkinter analytics dashboard for daily sales tracking and reporting; reduced inventory lookup time from manual to under 1 second.
- Owned the project end-to-end from schema design through GUI to handover.

Weather Forecast Telegram Bot — Hobby Project

Dec 2023

Python · python-telegram-bot · matplotlib · OpenWeather API

- Built a Telegram bot delivering daily forecasts with matplotlib-rendered temperature charts.
- Implemented command parsing, per-user city storage, and graceful API error handling.
- Source: github.com/OleksanderZabila/weather_telegram_bot-master

Transcriber Bot — Interview Challenge

Oct 2025

Python · python-telegram-bot · speech-to-text

- Telegram bot accepting voice/audio messages and returning transcribed text, built as a take-home interview task.
- Source: github.com/OleksanderZabila/transcriber-bot

Education

Master's in Computer Engineering — Interregional Academy of Personnel Management (MAUP) 2021 — 2027

(expected)

Specialty 121 · Online · Bachelor's completed within the same program · Cherkasy, Ukraine

English Language Courses — Online

2024 — Present

Current level: A2, actively improving for international team collaboration.
